

# Be More Efficient & Effective!

That's the bottom line! The EasyStand StrapStand allows therapists to be more efficient through multi-tasking. Stand one or two clients at the same time!

*Perinela & Nila enjoy each other's company, a change of position and a good stretch, during physical therapy.*

## Early Standing Allows More Progressive Therapy

Research has shown that the sooner you can get your clients standing, the more effective their therapy can be. Standing also helps speed recovery and regain balance.

*Melanie's therapist checks her blood pressure during her daily standing program.*

← Receive this FREE Gift!

The **EasyStand StrapStand** accommodates the unique needs of wheelchair users. It works great in nursing facilities and rehab centers. The StrapStand lifts clients directly from their wheelchair, bed or recliner into the standing position for a weight bearing program.

### Your Clients Will Benefit:

- Increased Range of Motion
- Improved Balance
- Progress Towards a Gait Program
- Pressure Relief
